

The following SDS references the products below:

LPS 3 Heavy Duty Rust Inhibitor Vendor Item Number: 00316

Manufactured By:

**ITW Pro Brands** 

Distributed by Kimball Midwest with the KM productidentification number:

*80-614* 

# LPS® 3® (Aerosol)

# **ITW Pro Brands. -GA**

Part Number: 00316, M00316

Version No: 12.23

Safety Data Sheet according to OSHA HazCom Standard (2024) requirements

Issue Date: **20/03/2025** Print Date: **20/03/2025** S.GHS.USA.EN

#### **SECTION 1 Identification**

#### **Product Identifier**

| Product name         | LPS® 3® (Aerosol)                                      |
|----------------------|--|
| Proper shipping name | Aerosols, flammable, (each not exceeding 1 L capacity) |

#### Recommended use of the chemical and restrictions on use

| Relevant identified uses | For Industrial Use Only                     |
|--------------------------|---|
| Relevant identified uses | Use according to manufacturer's directions. |

#### Name, address, and telephone number of the chemical manufacturer, importer, or other responsible party

| Registered company name | ITW Pro BrandsGA                              |
|-------------------------|---|
| Address                 | 4647 Hugh Howell Rd. Tucker, GA United States |
| Telephone               | 770-243-8800                                  |
| Fax                     | Not Available                                 |
| Website                 | www.itwprobrands.com                          |
| Email                   | lpssds@itwprobrands.com                       |

#### **Emergency phone number**

| • • • •                             |   |
|-------------------------------------|---|
| Association / Organisation          | Dykem/Dymon/Scrubs = Call InfoTrac For_LPS & Other Brands = Call Chemtrec   |
| Emergency telephone number(s)       | 1-800-535-5053 (InfoTrac Inside US) 1-800-424-9300 (Chemtrec Inside US)     |
| Other emergency telephone number(s) | 1-352-323-3500 (Infotrac Ouside US) +001 703-527-3887 (Chemtrec Outside US) |

#### SECTION 2 Hazard(s) identification

#### Classification of the substance or mixture

| Classification | Aerosols, Hazard Category 1, Skin Corrosion/Irritation Category 2, Serious Eye Damage/Eye Irritation Category 2A |  |
|----------------|--|--|
|----------------|--|--|

#### Label elements

Hazard pictogram(s)

Signal word

Danger

# Hazard statement(s)

| . ,       |  |
|-----------|--|
| H222+H229 | Extremely flammable aerosol. Pressurized container: may burst if heated. |
| H315      | Causes skin irritation.  |
| H319      | Causes serious eye irritation.   |

#### Hazard(s) not otherwise classified

Not Applicable

#### Precautionary statement(s) Prevention

| P210 | Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. |
|------|--|
| P211 | Do not spray on an open flame or other ignition source.  |
| P251 | Do not pierce or burn, even after use.   |
| P280 | Wear protective gloves, protective clothing, eye protection and face protection.               |
| P264 | Wash all exposed external body areas thoroughly after handling.                                |

Part Number: 00316, M00316 Page 2 of 12

Version No: 12.23

Issue Date: 20/03/2025

Print Date: 20/03/2025

#### Precautionary statement(s) Response

| P305+P351+P338 | IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. |
|----------------|--|
| P337+P313      | If eye irritation persists: Get medical advice/attention.  |
| P302+P352      | IF ON SKIN: Wash with plenty of water and soap.  |
| P332+P313      | If skin irritation occurs: Get medical advice/attention.   |
| P362+P364      | Take off contaminated clothing and wash it before reuse.   |

LPS® 3® (Aerosol)

#### Precautionary statement(s) Storage

P410+P412 Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.

#### Precautionary statement(s) Disposal

Not Applicable

# **SECTION 3 Composition / information on ingredients**

#### **Substances**

See section below for composition of Mixtures

#### **Mixtures**

| CAS No     | %[weight] | Name                                |
|------------|-----------|-------------------------------------|
| 64742-47-8 | 45-70     | PETROLEUM DISTILLATES LIGHT(R)      |
| 5131-66-8  | 5-10      | PROPYLENE GLYCOL MONOBUTYL ETHER(R) |
| 67-64-1    | 3-7       | Acetone*                            |
| 111-84-2   | 1-5       | n-nonane                            |
| 124-38-9   | 1-5       | carbon dioxide                      |
| 8052-41-3. | 0.1-<1    | Stoddard Solvent                    |

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret.

#### **SECTION 4 First-aid measures**

| Description | of | first | aid | measures |
|-------------|----|-------|-----|----------|
|-------------|----|-------|-----|----------|

| Eye Contact  | If aerosols come in contact with the eyes:  Immediately hold the eyelids apart and flush the eye continuously for at least 15 minutes with fresh running water.  Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids.  Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.  Seek medical attention in the event of irritation. |
|--------------|---|
| Skin Contact | If solids or aerosol mists are deposited upon the skin:  Flush skin and hair with running water (and soap if available).  Remove any adhering solids with industrial skin cleansing cream.  DO NOT use solvents.  Seek medical attention in the event of irritation.  |
| Inhalation   | If aerosols, fumes or combustion products are inhaled:  Remove to fresh air.  Lay patient down. Keep warm and rested.  Prostheses such as false teeth, which may block airway, should be removed, where possible, prior to initiating first aid procedures.  If breathing is shallow or has stopped, ensure clear airway and apply resuscitation, preferably with a demand valve resuscitator, bagvalve mask device, or pocket mask as trained. Perform CPR if necessary.     |
| Ingestion    | If spontaneous vomiting appears imminent or occurs, hold patient's head down, lower than their hips to help avoid possible aspiration of vomitus.   |

# Most important symptoms and effects, both acute and delayed

# Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

# **SECTION 5 Fire-fighting measures**

# **Extinguishing media**

SMALL FIRE:

Water spray, dry chemical or CO2

LARGE FIRE:

Water spray or fog.

# Special hazards arising from the substrate or mixture

▶ Avoid contamination with oxidising agents i.e. nitrates, oxidising acids, chlorine bleaches, pool chlorine etc. as ignition may result Fire Incompatibility

# Special protective equipment and precautions for fire-fighters

| Fire Fighting | GENERAL   |
|---------------|---|
|               | Alert Fire Brigade and tell them location and nature of hazard. |

#### LPS® 3® (Aerosol)

May be violently or explosively reactive. Wear breathing apparatus plus protective gloves. Consider evacuation Fight fire from a safe distance, with adequate cover. If safe, switch off electrical equipment until vapour fire hazard removed. Use water delivered as a fine spray to control fire and cool adjacent area. DO NOT approach cylinders suspected to be hot. Cool fire-exposed cylinders with water spray from a protected location. If safe to do so, remove containers from path of fire. FIRE FIGHTING PROCEDURES: • The only safe way to extinguish a flammable gas fire is to stop the flow of gas. If the flow cannot be stopped, allow the entire contents of the cylinder to burn while cooling the cylinder and surroundings with water from a suitable distance ▶ Extinguishing the fire without stopping the gas flow may permit the formation of ignitable or explosive mixtures with air. These mixtures may propagate to a source of ignition. SPECIAL HAZARDS • Excessive pressures may develop in a gas cylinder exposed in a fire; this may result in explosion. Cylinders with pressure relief devices may release their contents as a result of fire and the released gas may constitute a further source of hazard for the fire-fighter. Cylinders without pressure-relief valves have no provision for controlled release and are therefore more likely to explode if exposed to FIRE FIGHTING REQUIREMENTS: The need for proximity, entry and flash-over protection and special protective clothing should be determined for each incident, by a competent fire-fighting safety professional. Liquid and vapour are flammable. Moderate fire hazard when exposed to heat or flame. Vapour forms an explosive mixture with air. Moderate explosion hazard when exposed to heat or flame. Vapour may travel a considerable distance to source of ignition. Heating may cause expansion or decomposition leading to violent rupture of containers. Aerosol cans may explode on exposure to naked flame. Fire/Explosion Hazard Rupturing containers may rocket and scatter burning materials. ▶ Hazards may not be restricted to pressure effects May emit acrid, poisonous or corrosive fumes On combustion, may emit toxic fumes of carbon monoxide (CO). Combustion products include: carbon monoxide (CO) carbon dioxide (CO2) other pyrolysis products typical of burning organic material.

#### **SECTION 6 Accidental release measures**

#### Personal precautions, protective equipment and emergency procedures

See section 8

#### **Environmental precautions**

See section 12

#### Methods and material for containment and cleaning up

| Minor Spills | <ul> <li>Clean up all spills immediately.</li> <li>Avoid breathing vapours and contact with skin and eyes.</li> <li>Wear protective clothing, impervious gloves and safety glasses.</li> <li>Shut off all possible sources of ignition and increase ventilation.</li> <li>Wipe up.</li> <li>If safe, damaged cans should be placed in a container outdoors, away from all ignition sources, until pressure has dissipated.</li> <li>Undamaged cans should be gathered and stowed safely.</li> </ul>  |
|--------------|--|
| Major Spills | <ul> <li>Clear area of all unprotected personnel and move upwind.</li> <li>Alert Emergency Authority and advise them of the location and nature of hazard.</li> <li>May be violently or explosively reactive.</li> <li>Wear full body clothing with breathing apparatus.</li> <li>Prevent by any means available, spillage from entering drains and water-courses.</li> <li>Consider evacuation.</li> <li>Shut off all possible sources of ignition and increase ventilation.</li> <li>No smoking or naked lights within area.</li> <li>Use extreme caution to prevent violent reaction.</li> <li>Stop leak only if safe to so do.</li> <li>Water spray or fog may be used to disperse vapour.</li> <li>DO NOT enter confined space where gas may have collected.</li> <li>Keep area clear until gas has dispersed.</li> </ul> |

Personal Protective Equipment advice is contained in Section 8 of the SDS.

#### **SECTION 7 Handling and storage**

# Precautions for safe handling

# ■ Avoid all personal contact, including inhalation. ■ Wear protective clothing when risk of exposure occurs. ■ Use in a well-ventilated area.

- Prevent concentration in hollows and sumps.
- DO NOT enter confined spaces until atmosphere has been checked.
- Avoid smoking, naked lights or ignition sources.

Part Number: 00316, M00316 Page 4 of 12 Version No: 12.23

LPS® 3® (Aerosol)

Issue Date: 20/03/2025 Print Date: 20/03/2025

- Avoid contact with incompatible materials
- When handling, DO NOT eat, drink or smoke.
- DO NOT incinerate or puncture aerosol cans
- DO NOT spray directly on humans, exposed food or food utensils.
- Avoid physical damage to containers.
- Always wash hands with soap and water after handling.
- Work clothes should be laundered separately.
- Use good occupational work practice.
- Observe manufacturer's storage and handling recommendations contained within this SDS.
- Atmosphere should be regularly checked against established exposure standards to ensure safe working conditions are maintained.
- Keep dry to avoid corrosion of cans. Corrosion may result in container perforation and internal pressure may eject contents of can
- Store in original containers in approved flammable liquid storage area. DO NOT store in pits, depressions, basements or areas where vapours may be trapped.
- No smoking, naked lights, heat or ignition sources.
- Keep containers securely sealed. Contents under pressure.
- Store away from incompatible materials. Other information Store in a cool, dry, well ventilated area.
  - Avoid storage at temperatures higher than 40 deg C.
  - Store in an upright position.
  - Protect containers against physical damage.
  - Check regularly for spills and leaks.
  - ▶ Observe manufacturer's storage and handling recommendations contained within this SDS.

#### Conditions for safe storage, including any incompatibilities

#### Suitable container

- Aerosol dispenser.
- · Check that containers are clearly labelled.

#### Storage incompatibility

Avoid reaction with oxidising agents

 Compressed gases may contain a large amount of kinetic energy over and above that potentially available from the energy of reaction produced by the gas in chemical reaction with other substances

Must not be stored together

- May be stored together with specific preventions

- May be stored together

Note: Depending on other risk factors, compatibility assessment based on the table above may not be relevant to storage situations, particularly where large volumes of dangerous goods are stored and handled. Reference should be made to the Safety Data Sheets for each substance or article and risks assessed accordingly.

#### **Exposure controls**

Engineering controls are used to remove a hazard or place a barrier between the worker and the hazard. Well-designed engineering controls can be highly effective in protecting workers and will typically be independent of worker interactions to provide this high level of protection. The basic types of engineering controls are:

Process controls which involve changing the way a job activity or process is done to reduce the risk.

Enclosure and/or isolation of emission source which keeps a selected hazard 'physically' away from the worker and ventilation that strategically 'adds' and 'removes' air in the work environment. Ventilation can remove or dilute an air contaminant if designed properly. The design of a ventilation system must match the particular process and chemical or contaminant in use.

Employers may need to use multiple types of controls to prevent employee overexposure.

# Appropriate engineering controls

- Each operation should be provided with continuous local exhaust ventilation so that air movement is always from ordinary work areas to the operation.
- Exhaust air should not be discharged to regulated areas, non-regulated areas or the external environment unless decontaminated. Clean make-up air should be introduced in sufficient volume to maintain correct operation of the local exhaust system.
- For maintenance and decontamination activities, authorized employees entering the area should be provided with and required to wear clean, impervious garments, including gloves, boots and continuous-air supplied hood. Prior to removing protective garments the employee should undergo decontamination and be required to shower upon removal of the garments and hood.
- Except for outdoor systems, regulated areas should be maintained under negative pressure (with respect to non-regulated areas).
- Local exhaust ventilation requires make-up air be supplied in equal volumes to replaced air.
- Laboratory hoods must be designed and maintained so as to draw air inward at an average linear face velocity of 0.76 m/sec with a minimum of 0.64 m/sec. Design and construction of the fume hood requires that insertion of any portion of the employees body, other than hands and arms, be disallowed.

# 8.2.2. 8.2.2. 8.2.2. 8.2.2. 8.2.2. Personal protection

# Eye and face protection

- Safety glasses with side shields
- ► Chemical goggles.[AS/NZS 1337.1, EN166 or national equivalent]
- ► Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants.

#### Skin protection

#### See Hand protection below

#### Hands/feet protection

- OTHERWISE:For potentially moderate exposures:
- ▶ Wear general protective gloves, eg. light weight rubber gloves.

▶ No special equipment needed when handling small quantities.

- For potentially heavy exposures:
- Wear chemical protective gloves, eg. PVC. and safety footwear.

### Body protection

# See Other protection below

No special equipment needed when handling small quantities. **OTHERWISE:** 

# Other protection

- Overalls.
- Skin cleansing cream.
- Eyewash unit.
- Do not spray on hot surfaces.

#### Respiratory protection

Type A-P Filter of sufficient capacity. (AS/NZS 1716 & 1715, EN 143:2000 & 149:2001, ANSI Z88 or national equivalent)

Aerosols, in common with most vapours/ mists, should never be used in confined spaces without adequate ventilation. Aerosols, containing agents designed to enhance or mask smell, have triggered allergic reactions in predisposed individuals.

#### **SECTION 9 Physical and chemical properties**

#### Information on basic physical and chemical properties

| Appearance                                   | Brown             |   |               |

# **SECTION 11 Toxicological information**

# Information on toxicological effects

| a) Acute Toxicity                       | Based on available data, the classification criteria are not met.  |  |
|---|--|--|
| b) Skin Irritation/Corrosion            | There is sufficient evidence to classify this material as skin corrosive or irritating.  |  |
| c) Serious Eye<br>Damage/Irritation     | There is sufficient evidence to classify this material as eye damaging or irritating   |  |
| d) Respiratory or Skin<br>sensitisation | Based on available data, the classification criteria are not met.  |  |
| e) Mutagenicity                         | Based on available data, the classification criteria are not met.  |  |
| f) Carcinogenicity                      | Based on available data, the classification criteria are not met.  |  |
| g) Reproductivity                       | Based on available data, the classification criteria are not met.  |  |
| h) STOT - Single Exposure               | Based on available data, the classification criteria are not met.  |  |
| i) STOT - Repeated Exposure             | Based on available data, the classification criteria are not met.  |  |
| j) Aspiration Hazard                    | Based on available data, the classification criteria are not met.  |  |
| Inhaled                                 | Inhaled  The material is not thought to produce adverse health effects or irritation of the respiratory tract (as classified by EC Directives using animal models). Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in a occupational setting.  The vapour is discomforting  WARNING:Intentional misuse by concentrating/inhaling contents may be lethal. |  |
| Ingestion                               | Not normally a hazard due to physical form of product.  Considered an unlikely route of entry in commercial/industrial environments  |  |
| Skin Contact                            | This material can cause inflammation of the skin on contact in some persons.  The material may accentuate any pre-existing dermatitis condition  Open cuts, abraded or irritated skin should not be exposed to this material  Spray mist may produce discomfort  |  |
| Eye                                     | This material can cause eye irritation and damage in some persons.   |  |
| Chronic                                 | Main route of exposure to the gas in the workplace is by inhalation.   |  |

Ecotox database - Aquatic Toxicity Data 5. ECETOC Aquatic Hazard Assessment Data 6. NITE (Japan) - Bioconcentration Data 7. METI (Japan) - Bioconcentration Data 8. Vendor Data

Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

Do NOT allow product to come in contact with surface waters or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment wash-waters.

Wastes resulting from use of the product must be disposed of on site or at approved waste sites.

DO NOT discharge into sewer or waterways.

#### Persistence and degradability

| Ingredient                             | Persistence: Water/Soil   | Persistence: Air                 |
|--|---------------------------|----------------------------------|
| n-nonane                               | LOW                       | LOW                              |
| PROPYLENE GLYCOL<br>MONOBUTYL ETHER(R) | LOW                       | LOW                              |
| Acetone*                               | LOW (Half-life = 14 days) | MEDIUM (Half-life = 116.25 days) |
| carbon dioxide                         | LOW                       | LOW                              |

# Bioaccumulative potential

| Ingredient                             | Bioaccumulation       |
|--|-----------------------|
| PETROLEUM DISTILLATES<br>LIGHT(R)      | LOW (BCF = 159)       |
| n-nonane                               | HIGH (LogKOW = 5.65)  |
| PROPYLENE GLYCOL<br>MONOBUTYL ETHER(R) | LOW (LogKOW = 0.9842) |
| Stoddard Solvent                       | HIGH (LogKOW = 5.01)  |
| Acetone*                               | LOW (BCF = 0.69)      |

| carbon dioxide                         | HIGH (Log KOC = 1.498) |

# Other adverse effects

No evidence of ozone depleting properties were found in the current literature.

#### **SECTION 13 Disposal considerations**

#### Waste treatment methods

- ▶ DO NOT allow wash water from cleaning or process equipment to enter drains.
- It may be necessary to collect all wash water for treatment before disposal.
   In all cases disposal to sewer may be subject to local laws and regulations and these should be considered first.
- Where in doubt contact the responsible authority. Product / Packaging disposal
  - Consult State Land Waste Management Authority for disposal.
  - ▶ Discharge contents of damaged aerosol cans at an approved site.
  - Allow small quantities to evaporate.
  - DO NOT incinerate or puncture aerosol cans.
  - Bury residues and emptied aerosol cans at an approved site.

#### **Labels Required**

Marine Pollutant

Shipping container, transport vehicle placarding, and labeling may vary from the below information. This depends on the quantity shipped, the applicability of excepted quantity requirements, limited quantity requirements, and/or special provisions according to US DOT, IATA and IMDG regulations. In case of reshipment, it is the responsibility of the shipper to determine the appropriate labels and markings in accordance with applicable transport regulations.
